

Turbulence is the
chaotic flow of the
UNIVERSE.

Entropy is all that is,
and all that will be.
Order is temporary.
Scientists believe up to
95% of the Universe is
made of dark matter/energy,
but that's assuming the
math holds up. Order
is only the patterns we
find in the chaos, a fractal
in time and space, stretching
out in every direction towards
INFINITY.
